| Homebound status:                                                                                                                                                                                                                     |  |                       | Due to diagnosis of Pyonephrosis, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                  |  |
| Clinical Condition Requiring Homecare:                                                                                                                                                                                                |  |                       | <p class="MsoNoSpacing">Home health nursing admission was completed for a 71-year-old male with a past medical history significant for hypertension, hyperlipidemia, prostate adenocarcinoma, urinary retention, gout, prediabetes, hydronephrosis, hyperkalemia, and recent hospitalization for UTI with associated pain, nausea, and vomiting. The patient resides with his spouse in a townhouse with eight steps to enter and bedroom/bathroom access on the second floor. He was alert and oriented x3, pleasant, cooperative, and denied pain or discomfort during assessment. Vital signs were within normal limits. The patient ambulates approximately 30 feet indoors with a straight cane under supervision and requires supervision or close supervision for transfers and stair negotiation. Assessment revealed a patent and intact 16F Foley catheter draining clear yellow urine without difficulty or signs of infection, and no skin issues or open areas were noted. Medication reconciliation was completed, and skilled nursing education was provided regarding Foley catheter care, infection prevention, hydration, fall prevention, medication compliance, diabetic diet recommendations, monitoring urine output, and signs and symptoms of UTI or worsening condition requiring notification of the agency. Physical therapy assessment identified decreased strength, impaired mobility, and increased fall risk, with a Tinetti score of 15/28 indicating homebound status due to significant effort required to leave the home. The patient tolerated therapeutic exercises including supine hip flexion, bridging, hooklying rotation, straight leg raises, hip abduction, knee extension, and ankle pumps. Skilled nursing and home therapy services are recommended to continue for Foley catheter management, disease process education, strengthening, mobility training, and restoration of functional independence.</p><p class="MsoNoSpacing">Date of Order</p><p class="MsoNoSpacing">05/20/2026<br>Order</p><p class="MsoNoSpacing">Physician Face-to-Face Date: 05/19/2026<br>Clinical Condition Requiring Home Care per Certifying Physician: sn-disease management pt-eval & treat dx: Pyonephrosis<br>Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home</p><p class="MsoNoSpacing"><br>1 - SOC - SN Notes:<br>PT Eval Notes:<br></p><p class="MsoNoSpacing">Physician:<span style="font-size: 10.5pt; background: white;"> 10.5pt; background: white;"> </span>Chambers, Jerome</p> |                                  |  |

| <p>STANDING ORDERS: infection control: hygiene, proper hand washing; advance directive: plan if patient is unable to make healthcare decisions ; fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn; emergency preparedness: plan for prn evacuation, resumption of home health visits; Assess the patient's incision on post op day 7 and the nurse or physical therapist will remove aquacel dressing leaving OTA; if incision is draining educate pt/pcg on cleaning with normal saline and covering with dry gauze daily and as needed. Assess/Instruct Pt/Pcg: Ice to ____ x 20 minutes each hour while awake. If cold machine ordered apply 20 minutes on and 20 minutes off for 3-4 times a day. Assess/Instruct all body systems/vital signs/complications, Blood Pressure; systolic is greater than 169 mm Hg or less than 90 mm Hg; diastolic is greater than 100 mm Hg or less than 55 mm Hg, Clinician to assess comorbidities and report changes in condition to the patient's physician, Pain Rating is greater than 6 on 0-10 scale, Pulse is greater than 110 or less than 50, Respirations are greater than 22 or less than 8, SPO2: is less than 90 % at rest /with exertion, Temperature is greater than 100.5 F or less than 95.0 F, Pain Rating is greater than 6 on 0-10 scale Implement Fall Prevention Program, Instruct and educate the patient/PCG on wearing compression stockings for the next 4 weeks per discharge instructions. Instruct the pt/PCG on using the incentive spirometer 10 times every 2 hour while awake. Provide education content at patient's level of health literacy. Assess/Instruct Pt/Pcg: Safety measures to prevent injury. Assess: Musculoskeletal status. Teach Pt/PCg to maintain appropriate wt bearing status as ordered by MD, total joint replacement precautions as applicable, Safe stair climbing skills, Safe, effective use of adaptive/assist device Assess/Instruct Pt/Pcg: Pain management measures; assess pain level, pain medication, rest, body alignment, ROM, meditation, massage. Pt/PCg educated in pain management techniques including positioning and relaxation techniques Instruct Pt/Pcg: Medication actions, uses, frequency, dose, side effects, interactions of all new/change meds, Provide medication education,. Assess/Instruct Pt/Pcg: Safety measures to prevent injury, Therapeutic Exercise, Transfer Training Monitor surgical wound for s/s of infection, educate on s/s of concern and infection prevention to promote wound healing.</p> <p>; Skin Preservation: Measures to prevent skin breakdown; pressure relief, incontinence care, nutrition, hydration ; Pain: Pain management measures; pain medication, rest, body alignment, ROM, meditation, massage ; Medications: Medication actions, uses, frequency, dose, interactions of all new/change meds Advance Directive:No Advance Directive</p> <p>PROBLEMS IDENTIFIED ON ASSESSMENT: M2102d - Caregiver Performs Treatment, M2102c - Med Admin, meal preparation, M2102f - Patient Supervision, A1250 - Lack of Necessary Transportation, M2020 - Oral Med Management, M1400 - Dyspnea, abnormal blood pressure, M1033 - Exhaustion, M1610 - Urinary Catheter, M1600 - UTI, urine retention, limited strength, limited endurance, muscle weakness, B1000 - Vision Deficit, balance deficit</p> <p>PROCEDURES: monitor intake &amp; output, catheter change, care &amp; irrigation, teach/coordinate/arrange medication packaging and/or administration, coordinate/arrange preparation of missing meals</p> <p>Teach: how to minimize chemotherapy and radiation side-effects including management of nausea and/or vomiting, diarrhea, appetite loss, hair loss, fatigue and insomnia</p> <p>TEACH PATIENT/CAREGIVER: * lifestyle modifications to manage respiratory condition including diet changes and regular exercise strategies to control shortness of breath home remedies to keep lungs healthy, related medication(s) purpose, schedule, * urinary catheter management including how to flush catheter change and wash drainage bags prevent infection including proper handwashing positioning of catheter, related medication(s) purpose, schedule, * prevention including increase fluid intake increase Vitamin C intake to promote acidic bladder environment (cranberry juice) perineal hygiene, related medication(s) purpose, schedule, * strategies to minimize fatigue and exhaustion including work simplification energy conservation lifestyle changes diet, related medication(s) purpose, schedule, * how to keep home safe for patient with vision loss including eliminating hazards enhancing lighting using mechanical aids, patient self-administers medications as prescribed, related medication(s) purpose, schedule, patient's transportation needs are met, patient is adequately supervised, meal preparation is available to patient for all meals, caregiver administers and/or packages medications appropriately, caregiver performs medical/rehabilitation treatments with adequate competence</p> | <ul style="list-style-type: none"><li>* urinary catheter management including how to flush catheter</li><li>* change and wash drainage bags</li><li>* prevent infection including proper handwashing</li><li>* positioning of catheter</li><li>* recalls related medication(s) purpose, schedule</li></ul> <p>patient/caregiver recalls</p> <ul style="list-style-type: none"><li>* prevention including increase fluid intake</li><li>* increase Vitamin C intake to promote acidic bladder environment (cranberry juice)</li><li>* perineal hygiene</li><li>* recalls related medication(s) purpose, schedule</li></ul> <p>patient/caregiver recalls</p> <ul style="list-style-type: none"><li>* strategies to minimize fatigue and exhaustion including work simplification</li><li>* energy conservation</li><li>* lifestyle changes</li><li>* diet</li><li>* recalls related medication(s) purpose, schedule</li></ul> <p>patient/caregiver recalls</p> <ul style="list-style-type: none"><li>* how to keep home safe for patient with vision loss including eliminating hazards</li><li>* enhancing lighting</li><li>* using mechanical aids</li></ul> <p>patient self-administers medications as prescribed</p> <ul style="list-style-type: none"><li>* recalls related medication(s) purpose, schedule</li></ul> <p>patient's transportation needs are met</p> <p>patient is adequately supervised</p> <p>meal preparation is available to patient for all meals</p> <p>caregiver administers and/or packages medications appropriately</p> <p>caregiver performs medical/rehabilitation treatments with adequate competence</p> |
