Clinical Condition Requiring Homecare:		The patient is a 69-year-old homebound individual following a recent hospitalization for a urinary tract infection (UTI) and hyperglycemia. Medical history is significant for dysarthria, hypertension (HTN), cardiovascular disease (CVD), chronic kidney disease (CKD), congestive heart failure (CHF), atrial fibrillation (AFib), diabetes mellitus (DM), transient ischemic attack (TIA), and left tranmetatarsal amputation. The patient is alert and oriented 3, with warm, dry, intact skin and bruising noted on both arms from prior IV sites. Lung sounds are clear, respirations are even and unlabored, and the patient voiced no complaints during the assessment. The patient lives with a daughter who works and resides in a home with six steps and a handrail at the entrance. Although the bedroom and primary bathroom are located on the second floor, there is a full bathroom on the first floor, and the patient declined assessment of the second floor. Due to impaired mobility and an increased risk for falls, the patient ambulates approximately 30 feet indoors with a rollator under supervision, negotiates seven steps using a handrail and cane with supervision, and transfers to a chair and toilet with supervision. The therapist did not assess outdoor ambulation or car transfers. The patient is considered homebound because leaving the home requires significant effort, the use of an assistive device, and human assistance, as supported by a Tinetti Balance and Gait Assessment score of 13/28. The patient would benefit from skilled home physical therapy to improve strength, mobility, balance, and progression toward safe ambulation with a cane. Physician Face-to-Face Date: 07/15/2026 Clinical Condition Requiring Home Care per Certifying Physician: sn-disease progress pt-eval & treat ot-eval & treat dx: Urinary tract infection site not specified Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home Notes: PT PT Eval Notes: Physician: Capasso, Justin
