Clinical Profile

Provider's Name	Address	Phone Number
HomeCentris Healthcare LLC	10 Crossroads Drive, Suite 102 Owings Mills, MD 21117	410-321-8448
NPI: 1487113239		Fax Number: 410-559-3002

Clinical Condition Requiring Homecare:

The patient is a 61-year-old female with a past medical history significant for hypertension, hyperlipidemia, diabetes mellitus, HIV, liver disease, and cerebrovascular accident (CVA). She was recently hospitalized due to fluid accumulation in the lungs and was subsequently referred for home health services for disease process management, medication education, and physical therapy. The patient resides with her husband and must navigate 10 steps inside the home and 6 steps outside to exit the residence. She is considered homebound due to generalized weakness, a history of falls, impaired mobility, and the need for a wheelchair and supervision when ambulating or leaving the home. Skilled nursing services are ordered twice weekly for three weeks, along with physical therapy, to address her ongoing medical and functional needs. Upon assessment, the patient is alert and oriented to person, place, time, and situation (A&O x4). She denies chest pain, headache, nausea, and vomiting but reports shortness of breath with minimal exertion. Lung sounds are clear to auscultation. The abdomen is rounded with normoactive bowel sounds, and the patient reports her last bowel movement was this morning. Pedal pulses are present bilaterally, with +1 edema noted in both lower extremities. Continued skilled nursing services are indicated for ongoing assessment, disease process monitoring, medication education, and reinforcement of appropriate symptom management and safety precautions. The physical therapy evaluation was completed. Prior to hospitalization, the patient was primarily chair-bound and required moderate assistance for transfers. The current evaluation reveals significant bilateral lower-extremity weakness, with manual muscle testing (MMT) graded at 3-/5, impaired functional mobility, and the need for moderate assistance with transfers. She is currently unable to ambulate. Skilled physical therapy is medically necessary to improve bilateral lower-extremity strength, enhance balance, improve transfer ability, and promote safe and independent functional

Physician Statement on Homebound Status:

Due to diagnosis of Hypercalcemia, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.

mobility. The plan of care includes progressive therapeutic exercises, balance and transfer training, functional mobility activities, and patient and caregiver education on fall prevention and safety. Continued skilled nursing and physical therapy interventions are necessary to address the patient's medical and functional limitations, reduce the risk of complications and falls, and facilitate a safe return to her prior level of function as tolerated.

PARAMETERS FOR PHYSICIAN NOTIFICATION: Temperature < 95 > 100.5, Heart Rate < 50 > 110, Respiratory Rate < 8 > 22, Blood Pressure Systolic < 90 > 169, Blood Pressure Diastolic < 60 > 90, O2 Saturation < 88 > 100, Pain < 0 > 5, Blood Sugar < 60 > 300

CAREGIVER: 1. Non-agency caregiver(s) currently provide assistance

HOSPITALIZATION RISKS: 1. History of falls (2 or more falls - or any fall with an injury - in the past 12 months), 3. Multiple hospitalizations (2

or more) in the past 6 months, 7. Currently taking 5 or more medications, 9. Other risk(s) not listed in 1- 8

STANDING ORDERS: infection control: hygiene, proper hand washing; advance directive: plan if patient is unable to make healthcare decisions ; fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn; emergency preparedness: plan for prn evacuation, resumption of home health visits; Assess the patient's incision on post op day 7 and the nurse or physical therapist will remove aquacel dressing leaving OTA; if incision is draining educate pt/pcg on cleaning with normal saline and covering with dry gauze daily and as needed.
Assess/Instruct Pt/Pcg: Ice to ____ x 20 minutes each hour while awake. If cold machine ordered apply 20 minutes on and 20 minutes off for 3-4 times a day.
Assess/Instruct all body systems/vital signs/complications, Blood Pressure; systolic is greater than 169 mm Hg or less than 90 mm Hg; diastolic is greater than 100 mm Hg or less than 55 mm Hg, Clinician to assess comorbidities and report changes in condition to the patient's physician, Pain Rating is greater than 6 on 0-10 scale, Pulse is greater than 110 or less than 50, Respirations are greater than 22 or less than 8, SPO2: is less than 90 % at rest /with exertion, Temperature is greater than 100.5 F or less than 95.0 F, Pain Rating is greater than 6 on 0-10 scale
Implement Fall Prevention Program, Instruct and educate the patient/PCG on wearing compression stockings for the next 4 weeks per discharge instructions.
Instruct the pt/PCG on using the incentive spirometer 10 times every 2 hour while awake.
Provide education content at patient's level of health literacy.
Assess/Instruct Pt/Pcg: Safety measures to prevent injury.
Assess: Musculoskeletal status.
Teach Pt/Pcg to maintain appropriate wt bearing status as ordered by MD, total joint replacement precautions as applicable, Safe stair climbing skills, Safe, effective use of adaptive/assist device
Assess/Instruct Pt/Pcg: Pain management measures; assess pain level, pain medication, rest, body alignment, ROM, meditation, massage.
Pt/Pcg educated in pain management techniques including positioning and relaxation techniques
Instruct Pt/Pcg: Medication actions, uses, frequency, dose, side effects, interactions of all new/change meds, Provide medication education,.
Assess/Instruct Pt/Pcg: Safety measures to prevent injury, Therapeutic Exercise, Transfer Training
Monitor surgical wound for s/s of infection, educate on s/s of concern and infection prevention to promote wound healing.

; Skin Preservation: Measures to prevent skin breakdown; pressure relief, incontinence care, nutrition, hydration ; Pain: Pain management measures; pain medication, rest, body alignment, ROM, meditation, massage ; Medications: Medication actions, uses, frequency, dose, interactions of all new/change meds
Advance Directive:POLST (Physician Orders for Life-Sustaining Treatment)

SN NARRATIVE

Patient is homebound due to generalized weakness and falls requires wheelchair and supervision to ambulate and leave home.

Patient is a 61 year old female with PMH HTN, HLD, DM, HIV, liver disease. Patient lives with her husband and need to navigate 10 steps in home and 6 steps outside home. Patient admitted to home health care for disease process , medication education 2 visits weekly for 3 weeks for nursing and PT as per order.

Patient is alert and oriented x4, denies chest pain, headache, nausea and vomitting. SOB on minimum exertion. Patient lungs clear on auscultation. Abdomen rounded with normoactive bowel sounds LBM this morning. Pedal pulse present. +1 edema BLE.

SN GOALS

PATIENT-STATED GOAL: Strengthen my legs

GOALS
patient/caregiver recalls
* lifestyle modifications to manage respiratory condition including
* diet changes and regular exercise
* strategies to control shortness of breath
* home remedies to keep lungs healthy
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* how to maintain a diary to monitor effective and non-effective pain relief including documenting time of pain, rating, precipitating events, medications, treatments, and what works best to relieve pain
* teach relaxation skills and diversional activities
* recalls related medication(s) purpose, schedule

meal preparation is available to patient for all meals

patient/caregiver recalls
* how to keep home safe for patient with vision loss including eliminating hazards
* enhancing lighting
* using mechanical aids

patient self-administers medications as prescribed
* recalls related medication(s) purpose, schedule

coughing balance deficit lethargy pain radiating to arms/legs impaired speech headache daytime fatigue difficulty sleeping limited strength limited range of motion limited endurance muscle weakness poor muscle tone increased urine output diarrhea constipation heartburn/indigestion loss of appetite obesity drooling bruising/discoloration itchy skin abnormal BS < 70/140 > mg/dL B1000 - Vision Deficit meal preparation PROCEDURES: cough/deep breathing exercises, incentive spirometer, apply anti-embolitic stockings, swallowing exercises, glucose testing via monitor, coordinate/arrange preparation of missing meals, coordinate/arrange resources for vision-impaired TEACH PATIENT/CAREGIVER: * lifestyle modifications to manage respiratory condition including diet changes and regular exercise strategies to control shortness of breath home remedies to keep lungs healthy, related medication(s) purpose, schedule, * how to maintain a diary to monitor effective and non-effective pain relief including documenting time of pain, rating, precipitating events, medications, treatments, and what works best to relieve pain teach relaxation skills and diversional activities, related medication(s) purpose, schedule, * how to keep home safe for patient with vision loss including eliminating hazards enhancing lighting using mechanical aids, patient self-administers medications as prescribed, related medication(s) purpose, schedule, meal preparation is available to patient for all meals

GG0170R1 - Wheel 50 ft w 2 Turns
GG0170F1 - Toilet Transfer

PROCEDURES: Medication Review: - medications reviewed with patient/caregiver, home exercise program: Review HEP: seated knee ext, hip flex, hip abd, quad sets, gluteal squeezes, ankle pumps at least 1x10. Once tolerated, upgrade to standing heel/ toe raises, knee flex, hip flex, hip abd at least 1x10 with UE support as needed. Upgrade as tolerated, equipment training, work simplification/energy conservation, gait training/stair training: ., transfers training

TEACH PATIENT/CAREGIVER: Chair to Bed to Chair - 04. Supervision or touching assistance, Sit to Stand - 04. Supervision or touching assistance, Toilet Transfer - 05. Setup or clean-up assistance, 1 - Step (curb) - 02. Substantial/maximal assistance, 12 Steps - 02. Substantial/maximal assistance, 4 Steps - 02. Substantial/maximal assistance, Car Transfer - 04. Supervision or touching assistance, Picking Up Object - 02. Substantial/maximal assistance, Walk 10 Feet - 02. Substantial/maximal assistance, Walk 10 ft on Uneven Surface - 02. Substantial/maximal assistance, Walk 150 Feet - 02. Substantial/maximal assistance, Walk 50 ft with 2 Turns - 02. Substantial/maximal assistance, Oral Hygiene - 05. Setup or clean-up assistance, Toileting Hygiene - 05. Setup or clean-up assistance, Shower/Bathe Self - 03. Partial/moderate assistance, Upper Body Dressing - 05. Setup or clean-up assistance, Lower Body Dressing - 05. Setup or clean-up assistance, Don/Doff Footwear - 05. Setup or clean-up assistance

PT NARRATIVE
PT eval completed. Pt is a 61 y.o. female with PMH significant for HTN, HLD, DM, HIV, liver disease, CVA who was recently hospitalized due to fluid buildup in lungs. Prior to hospitalization, pt had been primarily chair bound but was doing transfers with modA. At this time, pt presents with decreased strength with 3-/5 MMT in BLE and requires modA for transfers and is unable to ambulate yet. Pt would benefit from skilled PT services to increase strength, improve balance and increase safety and independence in functional mobility in order to return to PLOF.

PT GOALS
PATIENT-STATED GOAL: To be able to walk with less help

GOALS
Sit to Stand - 04. Supervision or touching assistance

Chair to Bed to Chair - 04. Supervision or touching assistance

Toilet Transfer - 05. Setup or clean-up assistance

1 - Step (curb) - 02. Substantial/maximal assistance

12 Steps - 02. Substantial/maximal assistance

4 Steps - 02. Substantial/maximal assistance

Car Transfer - 04. Supervision or touching assistance

Picking Up Object - 02. Substantial/maximal assistance

Walk 10 Feet - 02. Substantial/maximal assistance

Walk 10 ft on Uneven Surface - 02. Substantial/maximal assistance

Walk 150 Feet - 02. Substantial/maximal assistance

Walk 50 ft with 2 Turns - 02. Substantial/maximal assistance

Oral Hygiene - 05. Setup or clean-up assistance

Toileting Hygiene - 05. Setup or clean-up assistance

Shower/Bathe Self - 03. Partial/moderate assistance
